---

SUMMARY:

Software Engineer with 1.9+ years of experience developing **full-stack web applications** using modern technologies such as **Vite, React.js, Node.js, PostgreSQL,** and **NestJs**. Proficient in **building scalable**, **high-performance systems** with a strong focus on **clean UI/UX**, **backend integration**, and **RESTful API development**.

EDUCATION:

- **Master's in Computer Application** [November 2022 - May 2024] VESIT - **C.G.P.A: 8.5**
- **Bachelor of Science (Information Technology)** [July 2019 - May 2022] -Sathaye College **C.G.P.A: 8.24**

TECHNICAL SKILLS:

- Frontend: **React.js, Next.js (v14+), Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma, React Hooks, Context API**
- Backend & Databases: **Node.js, NestJs, Express.js, PostgreSQL, MongoDB, REST API Development, WebSockets, Deno Fresh**
- Cloud & Infrastructure: **AWS (EC2, S3), NGINX, SSL**
- DevOps & Tools: **Git, GitHub, GitLab, Vite**

PROFESSIONAL EXPERIENCE:

Software Developer, Chintan Systems Private Limited | [January 2024 - Present]

- Spearheaded **full-stack development** for an **AI-powered ad generation platform (React, Vite, NestJs, PostgreSQL)**, leading to a **60% improvement** in **ad generation speed**. This involved implementing **a comprehensive ad editor** with customizable elements and integrating a **plan-based Stripe payment gateway**.
- Implemented **secure payment gateways**, including **Stripe** and **Razorpay**, which **enhanced transaction workflows** and increased success rates across multiple platforms.
- Developed **dynamic templates** and an **interactive chat UI** using the **OpenAI** and **Anthropic APIs**, **reducing manual ad input by 40%** and creating a **seamless user experience**.
- Led the **frontend development** for a **society management platform** using **React**, **Vite**, and **Tailwind CSS**, providing over **1000+ residents** with the ability to **track billing** and **manage their accounts** effectively.
- Designed and implemented **a full-stack P2P lending application,** enhancing core functionalities and **improving user experience** through **optimized UI components** and **API integration**.

PROJECT:

Freelance Marketplace | **[React.js, Node.js, PostgreSQL**, Tailwind CSS**, Web sockets, AWS]**

- Developed a **full-stack freelance marketplace** with **real-time bidding**, secure **JWT authentication**, and contract management.
- Engineered **REST APIs** and **WebSocket connections** for **job updates**, which **reduced response latency by 70%**.
- Integrated **AWS S3 for secure portfolio** and **media management**, providing a **scalable solution** for user-uploaded content.

Movix – Movie Discovery App | **[React.js, Redux Toolkit, TMDB API, Tailwind CSS]**

- Developed a **movie discovery platform** with search, trending, movie cards, trailers using **TMDB API**.
- Optimized performance by 40% with **code-splitting** and **lazy loading**.
- Designed a **responsive UI** for seamless use across devices, boosting user engagement.
